Forecast Purpose/Objectives

Ohio Department of Education's purposes/objectives for the five-year forecast are:

1. To engage the local board of education and the community in the long range planning and discussions of financial issues facing the school district.
2. To serve as a basis for determining the school district's ability to sign the certificate required by O.R.C. §5705.412, commonly known as the "412 certificate."
3. To provide a method for the Department of Education and Auditor of State to identify school districts with potential financial problems.

Forecast Methodology - This forecast is prepared based upon historical trends and current factors. This information is then extrapolated into estimates for subsequent years. The forecast variables can change multiple times throughout the fiscal year and while cash flow monitoring helps to identify unexpected variances no process is guaranteed. The intent is to provide the district's financial trend over time and a roadmap for decisions aimed at encouraging financial sustainability and stability.

Bethel Local Schools is experiencing rapid growth due to a new development. The District is currently seeing an average increase of 8-10% in student enrollment each school year.

There are no new levies projected during this forecast period but there is a projected approval of operating levy (renewal)

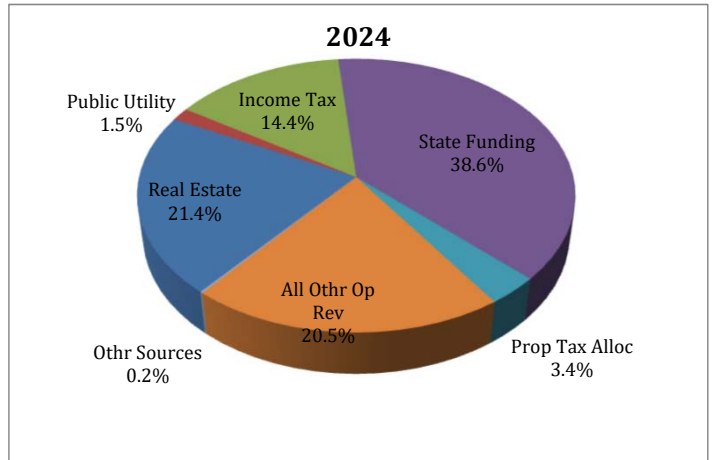

The District is projected to have deficit spending 4 of 5 years of forecast but will still have a positive ending cash balance at the end of FY2024.

Another way to look at ending cash is to state it in "True Cash Days." In other words, how many days could the district operate at year end if no additional revenues were received. This is the Current Years Ending Cash Balance divided by (Current Year Expenditures/ 365 days) = number of days the district could operate without additional resources or a severe resource interruption. The Government Finance Officers Association (GFOA) recommends no less than two (2) months or 60 days cash to be on hand at year end but could be more depending on each district's complexity and risk factors for revenue collection.

Based on projections, True Cash Days are as followed:

FY20=> 113 days, FY21=> 78 days, FY22=> 57 days, FY23=> 40 days, FY24=> 15 days

Bethel Local Schools is experiencing rapid growth due to a new development. The District is currently seeing an average increase of 8-10% in student enrollment each school year. As a result of the rapid growth the District is receiving additional monies from the state. Also, as a result of the new development there is a TIF agreement. In FY 2020 this generated \$2.985 million. The Board passed a resolution in FY 2018 where 30% of the receipts from the TIF are posted into a capital project fund for a maximum of 10 years. Therefore, \$2.089 million was maintained in the General Fund.

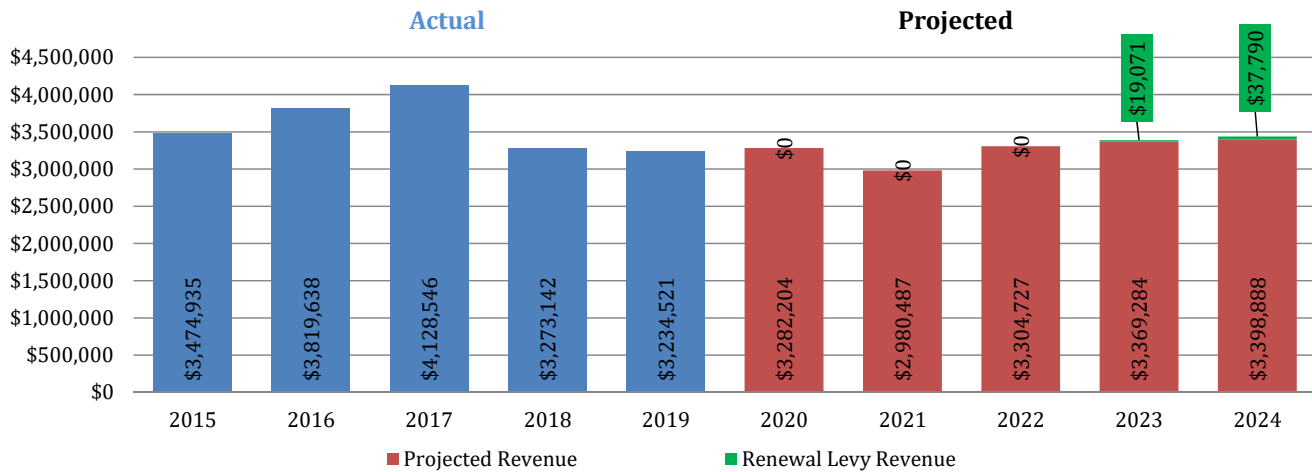

Overall, District Total Revenue is being projected to increase 4.64% each year over the next five years.

The Projection is being driven by:

- Income Tax Revenue which is expected to grow by approx. 3.5% in each year (over 5 year avg.)
- A State Funding increase due to increased enrollment, and
- The TIF agreement which is provided \$2.089 million in FY 20 after 30% allocation to capital projects fund as the development continues to be completed. Based on history of the revenue growth, it is estimated that revenue will increase approx. 15% during the forecast years. It is anticipated that the development will be completed between 2 to 3 years from now and eventually the revenue will level off (projected in FY 24). The major TIF (Carriage Trails) is a 30 year TIF which was approved back in 2005.

1.010 - General Property Tax (Real Estate)

Revenue collected from taxes levied by a school district by the assessed valuation of real property using effective tax rates for class I (residential/agricultural) and class II (business).

There are no new levies projected during this forecast period but there is a projected approval of operating levy (renewal). Prior fiscal years receipts included TIF revenue. From FY 18 and on, TIF revenue is posted to line 1.06 All Other Revenue.

Miami County had a reappraisal of property during 2019. Due to HB49, the School District saw a reduction in CAUV agricultural values. CAUV values represent 63.4% of Class 1 residential agricultural values. The new computation has resulted in CAUV values falling 22.5% after the reappraisal was completed. This will cause a shift in taxes from agricultural taxpayers to residential taxpayers but should not result in lower taxes to the district. It is anticipated that there will be modest growth on residential property during this time. Residential Property values went up by 13% after the reappraisal.

As of Calendar Year 2019, the District was at 20.001 mills. Ohio law states that a district can't fall below the 20 mill floor. Only current expense millage (inside or outside) counts towards the 20-mill floor. Levies for bonds, permanent improvement, and emergency do not count towards the 20-mill floor. Based on the reappraisal, the District is close to reaching the 20 mill floor in future years. The substitute levy tax rate is not part of the 20 mill floor requirement.

The District currently has a substitute (emergency) levy that was approved for 10 years back in November 2018. The District also has an operating levy up that will expire in December 2022. Due to the recent events, property taxes are estimated to be collected at 90% for FY21 rather than 100% in previous years in which district saw low delinquency. The green in fiscal years 2023-2024 represent the revenue at stake if not renewed and expires.

**Projected % trends include renewal levies*

1.020 - Public Utility Personal Property

Revenue generated from public utility personal property valuations multiplied by the district's full voted tax rate.

The District has minimal Public Utilities Personal Property and shows minimal growth. The green in fiscal years 2023-2024 represent the revenue at stake if the operating levy is not renewed and expires. Due to recent events, receipts are estimated to be collected at 90% for FY 21.

**Projected % trends include renewal levies*

1.030 - Income Tax

Revenue collected from income tax earmarked specifically to support schools with a voter approved tax by residents of the school district; separate from federal, state and municipal income taxes.

Income Taxes represent approx. 13.5% of the Fiscal Year 2020 total general fund revenue

The 0.75% income tax is based on wage earnings of district residents. Non-wage earnings (retirement, interest, etc.) are not subject to the income tax. The District successfully passed a renewal Earned Income Tax levy in November 2019. This allow the levy to be extended until December 31, 2025

Due to recent events, Income Tax Revenue is expected to grow by approx. 4-5% in FY 21 and FY 22 based on the new development within district. Fiscal Years 2023 and 2024 expected to grow by approx. 8%. The state recently extended filing of 2019 tax returns until July 2020 and with the structure of how income tax is collected and paid to school districts there could be some drops in revenue as with the delay filing as well as individuals could be layoff due to the current events. This will be monitor more closely and we will have a better understanding of how this source of revenue is by the next forecast filing in November 2020.

**Projected % trends include renewal levies*

1.035 - Unrestricted Grants-in-Aid

Funds received through the State Foundation Program with no restriction.

State Foundation Funding is flat for FY 20 and FY 21 based on what each District received in FY 19. A note to remember is in FY 19 the District was a **Cap District**.

Schools that are growing will receive additional funding. For growing school districts, districts will receive additional \$20 per pupil in FY 20 and \$30 per pupil for FY 21. Bethel is projected to receive additional funding of:

FY 20 => \$269,724

FY 21 => \$410,199

This is nowhere the amount the District should be receiving based on the current formula - **District lost approx. \$4.2million in FY19** by being a cap district.

Due to the recent events, the school funding from state was cut by \$134K for FY 20 which is reflected in this forecast.

Next year could see more cuts. At this time it is unknown. Therefore, the District is estimating the same amount for FY21

to be received as FY20. The Federal Government passed the Coronavirus Aid, Relief, and Economic Security Act (CARES)

which Ohio is receiving \$489 million which 90% will go to local education agencies in the same proportions under they receive Title I funds.

This could help offset some of any additional state funding cuts in FY 21-FY22.

1.040 & 1.045 - Restricted Grants-in-Aid

Funds received through the State Foundation Program or other allocations that are restricted for specific purposes.

Prior fiscal years included TIF revenue, which as of FY18 is posted to line 1.06 All Other Operating Revenue.

Rollback funds are reimbursements paid to the district from Ohio for tax credits given owner occupied residences equaling 12.5% of the gross property taxes charged to residential taxpayers on tax levies passed prior to September 29, 2013. HB59 eliminated the 10% and 2.5% rollback on new levies approved after September 29, 2013 which is the effective date of HB59.

Effective September 29, 2013 HB59 changes the requirement for Homestead Exemptions, individual taxpayers who no currently have their Homestead Exemption approved or those who do not get a new application approved for tax year 2013, and who become eligible thereafter will only receive a Homestead Exemption if they meet the income qualifications. Taxpayers who currently have their Homestead Exemption as of September 29, 2013 will not lose it going forward and will not have to meet the new income qualifications. This will slow the growth of homestead reimbursements to the district, and as with the rollback reimbursements above, increase the taxes collected locally on taxpayers on any new levies.

The green in fiscal year 2023-2024 represents the revenue at stake if operating levy is not renewed.

**Projected % trends include renewal levies*

Beginning in FY 2018, this line item includes TIF Revenue. The TIF agreement which is expected to provide \$2.089 million in FY 20 after 30% allocation to capital projects fund as the development continues to be completed. Based on history of the revenue growth, it is estimated that revenue for TIF will increase approx. 15% during the forecast years. It is anticipated that the development will be completed between 2 to 3 years from now and eventually the revenue will level off (projected in FY 24). The major TIF (Carriage Trails) is a 30 year TIF which was approved back in 2005.

This category also includes tuition, interest earnings, and rental property. Interest earnings have increased over last couple years due to the current market conditions as well as the District maintaining optimal amounts in its money market account. Rental property income is related to the land and house the District currently owns. The District is in the ELPP process with OFCC. Depending on the master facility plan designed, the district could see a slight decrease in revenue here as could be using the land for future buildings and will have less cash reserved to earn interest.

2.070 - Total Other Financing Sources

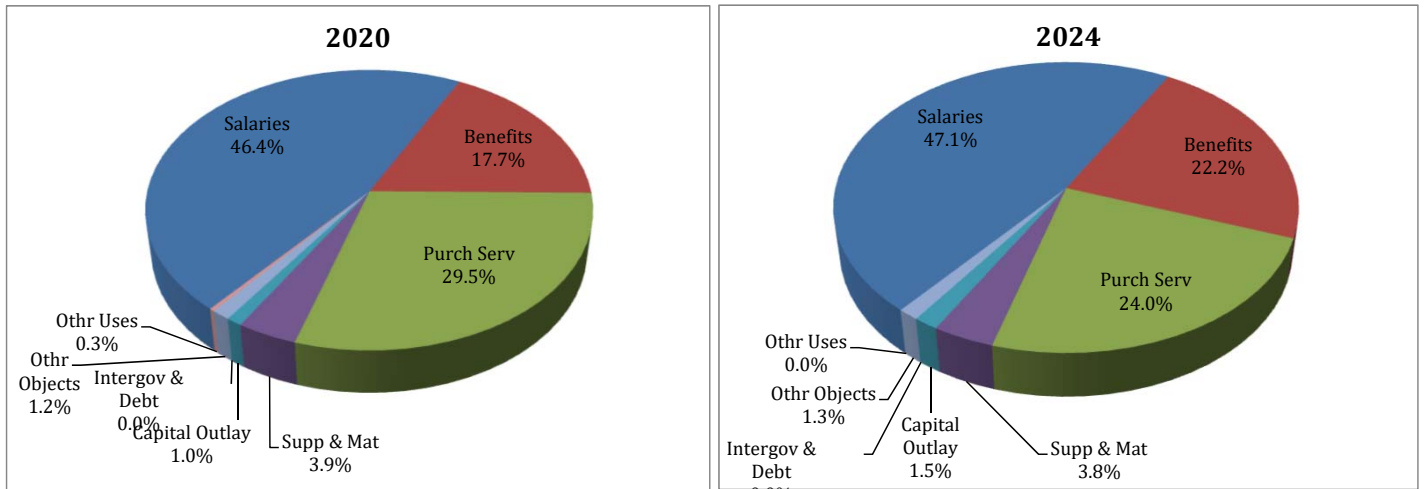

Includes proceeds from sale of notes, state emergency loans and advancements, operating transfers-in, and all other financing sources like sale and loss of assets, and refund of prior year expenditures.

This category includes refunds of monies spent in prior years and consisted mainly of SERS refunds. Care has been taken in future years to properly estimate SERS payments so as to not generate large refunds. The District also can receive an advance refund in relation to advancing funds at previous fiscal year end for any federal grant fund that had expenditures but had not received reimbursement. It is currently projected that this will not be needed for any fiscal year however could change depending on the timing of expenditures incurred and the request for reimbursement.

Overall expenditures are projected to increase on average at a rate of 7% per year. Salary and benefit spending is anticipated to increase in conjunction with additional staff due to increased enrollment. Each expenditure note goes into further detail about the year over year change.

Purchased services are also projected to increase as the district will require more services from the county ESCs and more special education services.

The District will also have higher operational costs due to building a new high school in FY 18 and the District currently in the ELPP process for future facility space.

3.010 - Personnel Services

Employee salaries and wages, including extended time, severance pay, supplemental contracts, etc.

Personnel Services represent approx. 47% of total expenditures of the District. It is projected that costs associated with personnel services to increase between 6-9% from FY20-24.

Per Bethel Education Association negotiated agreement, 3 retro steps are projected for FY 20 and FY 21.

During FY 2019, the following increases were approved for FY 20

- All administrators - 2% base salary increase
- All Classified staff who qualify - 2 retro steps

The District hired 6 additional teachers, 1 school counselor, and 1 bus driver for FY20.

5 certified, 1 paraprofessional staff, 1 classified position and 1 bus driver are being projected for FY21 for additional staff

4 certified, 1 paraprofessional staff, and 1 bus driver are being projected for FY22-24 for additional staff

In January 2020, the District hired 5 custodians as the district brought this position back within the school district as previous years it had been done through a purchase service agreement. The District plans to hire a 6th custodian by year end. FY 21 this position is within salary and benefits where as previous years it was within purchased services.

3.020 - Employees' Benefits

Retirement for all employees, Workers Compensation, early retirement incentives, Medicare, unemployment, pickup on pickup, and all health-related insurances.

Employees' Benefits represent approx. 19% of total expenditures of the District. It is projected that costs associated with Employees' Benefits to increase approx. 11% each fiscal year.

Most of the increase in benefits is being driven by additional staff.

Health insurance premium costs increased by 17% for FY20. Based on the current condition, the District is estimated a 7.5% increase in cost related to Health insurance premiums for FY21 and 10% from FY22-24

Vision insurance was first offered by District to all employees beginning in FY 19. FY 20 there was no change in the premium for vision. It is being projected to increase by 2% each year after (FY 21-24)

Dental Insurance Premiums remained constant for FY 20 and is projected to increase by 2% each year after (FY21-24)

Life Insurance is projected to increase by 2% each year. No change occurred in premium for FY 20

3.030 - Purchased Services

Amounts paid for personal services rendered by personnel who are not on the payroll of the school district, and other services which the school district may purchase.

Purchased Services represent approx. 27% of total expenditures of the District. It is projected that costs associated with purchased services to increase approx. 3-6% each year.

Purchased Services can be broken out into three categories which include instructional costs, utilities, and other purchased services.

- Instruction costs - cost associated to services provided through ESC, costs deducted from District's foundation payments such as open enrollment, charter schools, tuition, college credit plus. Costs related to special education are also under this.
- Utilities - cost associated for electricity, water, propane (District saw a drop in costs to propane for FY20 to due better market conditions for propane)
- Other purchased services - costs associated here include but not limited to legal services, repairs and maintenance, data processing.
- Custodian services were brought in-house with District and therefore you see a decrease in expenditures for FY20

3.040 - Supplies & Materials

Expenditures for general supplies, instructional materials including textbooks and media material, bus fuel and tires, and all other maintenance supplies.

Supplies and Materials represents approx. 4% of total expenditures of the District. It is projected that costs associated with supplies and materials to increase approx. 4% each year. Category includes general and instructional supplies, textbooks, and maintenance/transportations supplies.

FY 20 is a decline in expenditures as the District plans to have an off year and not adopt and purchase new textbooks. However, some textbooks will be bought due to the increase in enrollment.

3.050 - Capital Outlay

This line includes expenditures for items having at least a five-year life expectancy, such as land, buildings, improvements of grounds, equipment, computers/technology, furnishings, and buses.

Capital Outlay represents approx. 1.5 % of total expenditures of the District.

Costs associated here include chromebooks/laptops/equipment/furniture for students, teachers, and staff. It also equipment for maintenance and equipment.

Increase projected in FY 20 is due to District purchasing furniture for 3 classrooms in Elementary. The District also looking at updating staff laptops through the next couple of year as well as purchase additional laptops due to the need for additional staff due to increase enrollment.

The District also has two Permanent Improvement levies that each generate funds that total approx. \$513,000 that is to be used for capital projects and improvements. Although not included here as forecast only looks at general fund, it is important to note the availability of other funds for capital outlay expenditures.

Due to rapid growth of student enrollment, the District is full capacity of its facilities. The District is currently in the ELPP Program through Ohio Facilities Construction Commission (OFCC) and developing a master facility plan. Additional costs could be projected in future to accommodate the immediate needs of the District.

3.060-4.060 - Intergovernmental & Debt

These lines account for pass through payments, as well as monies received by a district on behalf of another governmental entity, plus principal and interest payments for general fund borrowing.

The largest expenditure in this line item is for the County Auditor and Treasurer Fees in relation to collection of property taxes. The reason for the fluctuation between the years is that the District changed from filing GAAP financial statements to Cash-Basis financial statements. Due to this and the District currently not receiving enough federal funds to be a single audit, the District is under a 2 year audit cycle with Ohio Auditor of State.

In prior years, the District transferred money to athletic fund for participation fee receipts that were received. FY 19 and forward those fee receipts are being directly posted into the athletic fund. In case the school supply fund and athletic fund are not able to maintain a surplus balance based on the fees being charged in relation to the costs to provide those services, the general fund may need to transfer funds to maintain those funds. As of now, it is to be believe that the school supply fund and athletic fund will be able to maintain a surplus balance based on the fees established. The District also transferred money received from the TIF to Bond Retirement Fund in FY 18. FY 19 and FY 20 this was not required. Future years this transfer could be required. However, the District is looking at refinancing the bonds and based on the result in savings this transfer may be obsolete.
